Washington, DC 20554

Re: Comments to Further Notice of Proposed Rulemaking
Amendment of Parts 15, 74, and 90 of the Commission's Rules Regarding Low Power
Auxiliary Stations, Including Wireless Microphones
WT Docket Nos. 08-166, 08-167; ET Docket No. 10-24

Dear Chairman Genachowski:

I am writing on behalf of millions of users of wireless microphones, in ear monitor systems and intercom systems in use in Houses of Worship, sporting events, corporate meetings, and by national and local bands and entertainers. I am asking that licenses and the use of these technologies be protected for the end users, companies, entertainers etc. that already own, rent and sell these technologies. I work with users who operate these systems during church broadcasts, video productions and televised events, as well as many other users who operate these systems for other professional applications. I want to make sure that we have the ability to get licenses and that no one will be forced out of using their equipment if used professionally and properly.

I use these systems for churches, and also rent and sell equipment for events where these systems enhance the message and make the communication easier and clearer for many of the audience members. Wireless microphones especially allow a pastor to move freely about in their congregation, just as sales and corporate users need these technologies also. I own and operate many systems and every year the rental of these systems is a good part of our business. We would lose a significant portion of our revenue if licenses aren't made available for our company.

I ask the FCC to ensure that any rule changes that the FCC adopts allow Pearl Pro Audio, my customers and renters to obtain an FCC wireless microphone license and continue doing what we are doing now. If you have any questions, please do not hesitate to contact the undersigned.

Very truly yours,

Don Lanier
